

JOSH BARTEAUX

QA Automation Engineer, Yacht Captain

@joshbardeaux@gmail.com [LinkedIn.com/in/joshbardeaux](https://www.linkedin.com/in/joshbardeaux) 📍 US Citizen

SUMMARY

Shortly after moving to a small Caribbean island in the 15th year of my software development career, I took a brief hiatus to ride out the pandemic working as crew of a 60' catamaran. Now, with more than three years captaining various motor and sailing vessels, I look forward to bringing my combined skills, experience, and goals back to the technology space as part of a talented and inspiring development team.

ON LAND

QA Engineer

Raytheon

📅 2017 - 2021

- Created and managed test plans in Microsoft Azure DevOps
- Produced manual tests in Azure
- Wrote and executed API testing in Postman
- Conducted database and white box testing with SQL
- Executed automated regression testing in Selenium with Cucumber BDD framework
- Assumed role of Scrum Master

Lead QA Engineer

SiriusDecisions

📅 2014 - 2017

- Defined and owned all aspects of QA process as the firm's first QA Analyst
- Managed testing in LeanKit
- Manual testing and automated regression testing in SmartBear
- TestComplete
- API testing in ReadyAPI
- Maintained traceability matrix in LeanKit
- Administrated UXM AlertSite for site monitoring solution
- Hired, trained, and mentored junior QA technician after two years as solo analyst

UAT Analyst

McKesson

📅 2013 - 2014

- Developed and implemented UAT efforts for ICD-9 to ICD-10 upgrade
- Coordinated with product owners, business analysts, and user group to support testing
- Utilized VersionOne with HP ALM (Application Lifecycle Management) to manage user stories and other Agile artifacts

Senior IT Quality Assurance Analyst

Hard Rock Hotel & Casino

📅 2006 - 2013

- Researched and implemented QA best practices and training documents as primary QA Analyst of newly formed Agile-mix team
- Reviewed requirement documents and release notes for compatibility with existing environment
- Trained, managed, and mentored team of two Quality Assurance Technicians

TECH STACK

DevOps	Agile/Scrum	CI/CD	Git
Playwright	Vertex AI	MCP	API
Codex/VSC	Gemini/Antigravity	GCP	
Blender 3D	Figma	AI Studio	LEGO

LICENSE & CERTIFICATION

USCG MMC	50 GRT	Auxiliary Sail
US Passport	MROP	TWIC
PADI Advanced	WICO Clearance	
STCW Basic	APCA Consortium	

COMMUNITY & HOBBIES

- 🛶 IC-24 Sailing Coach for youth summer sailing camp
- 👥 VIPCA volunteer sailing assistant
- 🌐 IC-24 Adventure Sailing Club
- 🏃 St John Half-marathon Trail Run
- 🕒 CORE certified NPS lion fish hunter

BOAT MAINTENANCE & IMPROVEMENTS

- 🛠 Upgraded lines and installed new cleats to be in compliance with BoatUS standards
- ⚡ Built storm kit to BoatUS standards
- 🔧 Replaced two fuel tanks, fuel lines, and filter
- 🏆 Installed mid-ship eyes to be in compliance with Yacht Haven Grand requirements

ON LAND

Avionics Guidance and Control Specialist

US Air Force

📅 2000 - 2004

- Maintained flight control systems of C-17 cargo jets
- Repaired and replaced control surfaces
- Troubleshoot fly-by-wire and flight control computers
- Repaired damaged hydraulic cylinders and electric actuators
- Conducted inspections
- Kept documentation of all repairs and activities
- Utilized schematics, wiring diagrams, technical orders, release notes, and advanced test tools for troubleshooting and repair

AT SEA

Catamaran, Sailing, and Powerboat Captain

Freelance

📅 05/2024 - Current

Captaining six vessels including 42' & 52' SV catamarans and 42' Hinckley MV yachts for up to 50 guests while continuing to captain Cycleboat full-time.

- Largely private bookings for day trips around Pillsbury Sound and the BVI
- Popular charter with local US Virgin Islanders
- Many loyal repeat guests

Powerboat Captain

St Thomas Cycleboat

📅 11/2022 - 09/2024

My first boat as captain. An unusual vessel that's been an excellent learning experience with greatly increased responsibility while ensuring a safe and enjoyable trip for my guests and crew. With the General Manager based in Utah year round and the owner in Manhattan, I also take lead on many of the operational aspects in addition to running trips. Fun fact: no captain has more time on Cycleboat.

- 31' powerboat, 16 pax
- Day trips from Havensight and Crown Bay to Water Island
- Recruiting, training, mentoring, and leading a diverse team of five crew
- Monthly safety drills
- Storm preparation
- Annual USCG COI
- FareHarbor admin
- Befriending and ingratiating dock masters and port authorities
- Critical emergency maintenance and calamity avoidance while underway making way
- If it needs to be done, I'm the Cap'n to make it happen

Catamaran Crew

Breakaway & New Horizons

📅 05/2020 - 12/2022

The launch of my current chapter on the water.

- 60' catamaran Snorkel Cat, auxiliary sail, 35 GRT, 55 pax
- Day trips and sunsets around the islands of Pillsbury Sound
- Lunch and small plate service beautifully and thoughtfully presented
- Working full-time while in night school for USCG credentials, STCW, MROP, and Aux Sail
- Crafting wonderment with facts and fictions of island history and the local marine environment

BOAT MAINTENANCE & IMPROVEMENTS

Troubleshoot and resolved repeated failure of dual-rudder steering system

Repaired and eventually replaced electric winch

Constructed custom boat ladder after a half-dozen failed off-the-shelf attempts by previous captains, which remains sturdy over one year later

Devised solution to heighten overall guest comfort by redistributing onboard storage and adding new seating for better weight distribution to minimize listing

Installed GPS tracking system with automated location notifications, thus increasing safety by eliminating previous need for the captain to manually send text messages to Operations Manager and shore crew at each pickup and drop-off

Frame repair and rudder reinstallation

SIDE HUSTLES

Superhost

Airbnb

📅 06/2021 - Current

Originally intended simply to bridge the gap between my senior-level career in software development and the entry-level boat crew position, but I've found an easy satisfaction in hosting fellow travelers.

- At the earliest possibility, I swiftly earned and have since retained the coveted Airbnb Superhost status
- Property remains booked year round
- Fully self-maintained operation

Quality Assurance Engineer

Test IO

📅 2023 - Current

An artifact of my days in software development.

- Freelance software gig to stay up-to-date with ever-changing technology
- No set schedule
- Working as little or as much as I like (lately, very little)
